MOREK

Creating a better future for You

Trusted Morek Bow terminals. Secured connections, simplified Installations.

Easy Installation

Quick and simple setup saves time on every installation.

Suitable for cables and flexible busbars

Reliable Electrical Contact

Visible tightening torque ensures a secure, long-lasting connection.

Morek Bow Terminals MAE-E, the ideal solution for professionals working with copper and aluminum busbars. Designed for ease of use, these terminals ensure quick installation and reliable performance.

With the ability to connect flexible busbars without the need for TIN plating, Morek Bow Terminals help streamline modifications and enhance electrical contact quality.

The sturdy, galvanized steel body and stainless-steel pressure spring provide durability, while the visible tightening torque indication guarantees a secure connection every time.

Upgrade your installations. Experience the performance of Morek Bow Terminals.
